

GOD’S WORDS FOR TODAY (Jn 8: 31-42)

The Holy Gospel according to St. John

Jesus said to those Jews who believed in him, “If you remain in my word, you will truly be my disciples, and you will know the truth, and the truth will set you free.” They answered him, “We are descendants of Abraham and have never been enslaved to anyone. How can you say, ‘You will become free?’” Jesus answered them, “Amen, amen, I say to you, everyone who commits sin is a slave of sin. A slave does not remain in a household forever, but a son always remains. So if the Son frees you, then you will truly be free. I know that you are descendants of Abraham. But you are trying to kill me, because my word has no room among you. I tell you what I have seen in the Father’s presence; then do what you have heard from the Father.”

They answered and said to him, “Our father is Abraham.” Jesus said to them, “If you were Abraham’s children, you would be doing the works of Abraham. But now you are trying to kill me, a man who has told you the truth that I heard from God; Abraham did not do this. You are doing the works of your father!” So they said to him, “We were not born of fornication. We have one Father, God.” Jesus said to them, “If God were your Father, you would love me, for I came from God and am here; I did not come on my own, but he sent me.”

MISSION VISION

“To be a sign of faith as an excellent educational institution, sharing in the Lasallian mission of teaching minds, touching hearts and transforming lives.”

FROM THE OVCAD – INSTITUTIONAL HEALTH SERVICES:

cont...Burn

Third-Degree Burn

Third-degree burns are the worst burns. They cause the most damage, extending through every layer of skin. The damage can even reach the bloodstream, major organs, and bones, which can lead to death.

There is a misconception that third-degree means most painful. With this type of burn, the damage is so extensive that you may not feel pain because your nerves are damaged. Depending on the cause, third-degree burns cause the skin to look:

- waxy and white
- charred
- dark brown
- raised and leathery

Never attempt to self-treat a third-degree burn. While you’re waiting for medical treatment, raise the injury above your heart. Don’t get undressed, but make sure no clothing is stuck to the burn. There is no set healing timeline for third-degree burns.

Complications

Third-degree burns carry the most risk for complications, such as infections, blood loss, and shock. Still, this doesn’t mean that minor first and second-degree burns can’t cause complications. All burns carry the risk of infections because bacteria can enter broken skin. Sepsis, or a bloodstream infection, can occur in the most severe cases. This can lead to shock or even death.

Tetanus is another possible complication with burns of all levels. Like sepsis, tetanus is a bacterial infection. It affects the nervous system, eventually leading to problems with muscle contractions. As a rule of thumb, every member of your household should receive updated tetanus shots every five years to prevent this type of infection.

Severe burns also carry the risk of hypothermia and hypovolemia. Hypothermia is characterized by dangerously low body temperatures. While this may seem like an unexpected complication of a burn, the condition is actually prompted by excessive loss of body heat from an injury. Hypovolemia, or low blood volume, occurs when your body loses too much blood from a burn.

Scars are a complication of all burns. Severe burns may cause keloids, which are discolored areas of scar tissue on the skin. While keloids aren’t harmful in themselves, they can be bothersome. The appearance of scar tissue can worsen with sun exposure, so be sure to wear adequate sunscreen on any exposed areas.
