

**GOD’S WORDS FOR TODAY (Jn 8: 21-30)**

**The Holy Gospel according to St. John,**

Jesus said to the Pharisees: “I am going away and you will look for me, but you will die in your sin. Where I am going you cannot come.” So the Jews said, “He is not going to kill himself, is he, because he said, ‘Where I am going you cannot come’?” He said to them, “You belong to what is below, I belong to what is above. You belong to this world, but I do not belong to this world. That is why I told you that you will die in your sins. For if you do not believe that I AM, you will die in your sins.” So they said to him, “Who are you?” Jesus said to them, “What I told you from the beginning. I have much to say about you in condemnation. But the one who sent me is true, and what I heard from him I tell the world.” They did not realize that he was speaking to them of the Father. So Jesus said to them, “When you lift up the Son of Man, then you will realize that I AM, and that I do nothing on my own, but I say only what the Father taught me. The one who sent me is with me. He has not left me alone, because I always do what is pleasing to him.” Because he spoke this way, many came to believe in him.

**MISSION VISION**

“To be a sign of faith as an excellent educational institution, sharing in the Lasallian mission of teaching minds, touching hearts and transforming lives.”

## FROM THE OVCA – INSTITUTIONAL HEALTH SERVICES:

### *cont...Burn*

#### **Second-Degree Burn**

Second-degree burns are more serious because the damage extends beyond the top layer of skin. This type of extensive damage causes the skin to blister and become extremely red and sore. Some blisters pop open, giving the burn a wet appearance.

Due to the delicate nature of such wounds, frequent bandaging is required to prevent infection. This also helps the burn heal quicker. Some second-degree burns take longer than three weeks to heal, but most heal within two to three weeks. The worse the blisters are, the longer the burn will take to heal. In some severe cases, skin grafting is required to fix the subsequent damage. Skin grafting borrows healthy skin from another area of the body and replaces it at the site of the burned skin.

As with first-degree burns, avoid cotton ball wraps and questionable home remedies. You can generally treat a mild second-degree burn by:

- running the skin under cool water for 15 minutes or longer
- taking over-the-counter pain medication
- applying antibiotic cream to blisters

However, seek emergency medical treatment if burns affect a widespread area of the:

- face
- hands
- buttocks
- groin
- Feet
